TACO + DRONE

who we are

TacoDrone is a group of UT students working together to tackle our generation's greatest challenge: on-demand, aerial taco delivery.
Our goal is to assemble a fleet of drones to deliver tacos across a small area of downtown austin, over the course of March 23rd-24th.

what we need

The drones are assembled, the delivery network is in place, and the app is getting it's last layer of finishing touches. All we're missing is tacos.
Tacodrone is a non-profit student project, and will deliver tacos to those that request them for free.

how you benefit

In exchange for 99 tacos, you get viral marketing and the goodwill of austinites across SXSW.
As part of the delivery process, your company gets credited on the app. It's a really inexpensive way to generate a lot of coverage and promote your brand.

Tacodrone in Numbers

- **99 Tacos.** *33 Beef + 33 Veggie 33 Chicken*
- **March 23rd-24th**
- **100% Non-Profit** *Tacos+Delivery are Free*
- **Eternal** *Grattitude to you for supporting this project*
